PILLOWS

Sleep experts agree that having the right pillow goes a long way towards a restful, healthier sleep.

Sealy has created a range of ultra-comfortable pillows, each designed to give your head and neck the support they need throughout the night, while helping to regulate temperature and comfort. See which one best suits your sleep.

Just as your bed provides good support for your body, your pillow should give you the correct cushioning to properly support your head and neck. It should hold your head in the same relation to your shoulders and spine as if you were standing with correct upright posture.

If you sleep on your side, you may want a fairly firm pillow to give your head and neck extra support. If you sleep on your back, try a medium-firm pillow to cradle your head with more 'give.' And if you sleep on your stomach, choose a soft pillow to lessen the strain on your neck.
